## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hayashi et al (5,830,086) in view of Tsunoda et al (2002/0183135). Hayashi discloses a golf ball comprising a core, an inner cover layer, and an outer cover layer. The core has a distortion from 2.0 to 7.0 mm. The outer cover has a Shore F hardness of at least 60 and is harder than the inner cover layer. The cover layer has a thickness from 0.3 to 3.0 mm and may be made from resins such as 1706 and 1605, which are equivalent to applicant's (spec 12). Hayashi does not disclose organic fibers in the cover. Tsunoda teaches a golf ball cover made from Himilans 1706 and 1605 and organic short fibers [0086]. One of ordinary skill in the art would have modified the cover of Hayashi for enhanced durability.

### ***Allowable Subject Matter***

Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
